Course Description

This is an introductory course in formal logic. The formal languages of truth functional logic (TFL) and first order logic (FOL) will be introduced along with proof procedures for these logics.

Course Learning Outcomes

Formal logic aims to understand how statements of natural languages (e.g., English) acquire their truth values, and why in some cases the premises of an argument entail its conclusion and why in other cases they do not. To acquire an understanding of these matters, we will learn the formal languages of TFL and FOL as well as how to symbolize statements of English into these formal languages. We will also learn how to test for semantic properties, such as validity, consistency and equivalence, by using the proof procedures of natural deductions and truth trees.

Required Text: Forallx by P.D. Magnus (Available on D2L)

Course Assessment

The final grade will be determined by 4 in class tests and 3 assignments. Policy on missed tests and late assignments: zero will be the assigned grade unless the absence/lateness is university approved. The assignments will be posted on D2L and a hard copy can be submitted either in class or into a drop-box located in the department of philosophy (12th floor Social Sciences Building) by 4:00 PM on the due date. Assignments will not be accepted via email under any circumstances. There is no registrar-scheduled final exam for this course.

Absence or Missed Course Assessments
Students who are absent from class assessments (tests, participation activities, or other assignments) should inform their instructors as soon as possible. Instructors may request that evidence in the form of documentation be provided. If the reason provided for the absence is acceptable, instructors may decide that any arrangements made can take forms other than make-up tests or assignments. For example, the weight of a missed grade may be added to another assignment or test.
