This course critically examines metaphysical and ethical issues surrounding death. It is divided into three parts. Beginning with Epicurus’ claim that death is “nothing to us” because “when we are, death is not, and when death is, we are not,” the first part of the course focuses on the claim and argument that death is bad because it deprives us of additional good life years. We will read articles by philosophers as well as works of literature that address this question. The second part of the course examines arguments for and against radical life extension and immortality and the question of whether a much longer mortal life or an immortal life would be desirable or undesirable. It also explores different psychological responses to the inevitability of death and how these responses shape our lives. The third part of the course addresses applied ethical questions and arguments concerning euthanasia and assisted suicide.
