COURSE INFORMATION

The claim that time passes, or flows, seems to be a truism. What, though, does it amount to, if anything? Should our mature theory of time be required to make sense of the flow of time and, if so, how? In this course we'll examine this question with particular attention to the moving spotlight theory, which combines an ontology on which the past, present, and future all exist with the claim that time objectively passes, or flows.
